

HOW DOES THEIR STOVE COMPARE?

Ask these simple questions and see how the competition stacks up.

1

Do you have to change the fire pot when changing from one fuel type to another?

2

What is the stove's exhaust temperature?

3

How much of the BTU generated actually goes into the room as heat and not up the exhaust?

4

How long does it take to clean the fire pot and agitator?

5

Can you change your fuel settings and feed speed with the push of a button?
